# SAT: What's Different About 2017 Scores

Students in the Class of 2017 took both the Old SAT and the Redesigned SAT.

Old SAT scores were concorded to the Redesigned SAT score scale.

Old Scores	New Scores
Total 2400 (CR+W+M): 600-2400	Total Score (EBRW+M): 400-1600
Total 1600 (CR+M): 400-1600	Total Score (EBRW+M): 400-1600
Writing plus Critical Reading Sections (W+CR): 400-1600	Evidence-Based Reading and Writing Section (ERW): 200-800
Math Section (M): 200-800	Math Section (M): 200-800

# What are SAT College & Career Readiness Benchmarks?

Students are considered college- and career-ready when their SAT section scores meet both the Math and the Evidence-Based Reading and Writing benchmarks. It is important to note that college readiness is a continuum — students scoring below the SAT benchmarks can still be successful in college, especially with additional preparation and perseverance.

Students with an SAT Math section score that meets or exceeds the benchmark have a 75 percent chance of earning at least a C in first-semester, credit-bearing college courses in algebra, statistics, pre-calculus, or calculus.

Students with an SAT Evidence-Based Reading and Writing (ERW) section score that meets or exceeds the benchmark have a 75 percent chance of earning at least a C in first-semester, credit-bearing college courses in history, literature, social sciences, or writing classes.
